

## Superior Clay Glazed Firebrick

### Information and Specifications

Glazed Firebrick by Superior Clay give Homeowners, Designers and Installers options like never before! Whether it's matching a stone surround, or contrasting with paint colors, your fireplace can be a beautiful centerpiece without compromising on the brick.

Superior Clay Firebrick are specially formulated and processed to withstand repeated heating cycles in a fireplace. Our firebrick are suitable for use in wood burning fireplaces, as well as approved gas appliances. All brick meet ASTM C 1261.

**Glazing Process:** First, the brick is carefully sorted, we use the cleanest brick with the fewest blemishes. The brick are individually sprayed with a ceramic glaze, on 5 sides, and then kiln fired, as the engineered glazes fuse perfectly onto the brick surface without crazing or bubbling.

**Options:** Standard colors include Black, Dark Red, Slate Grey, Grey Limestone, Silver Grey, Gold, & Antique Blend. Custom colors are also available.

**Advantages:** Ceramic glazes offer a bolder color range that cannot be achieved with other brick coloring methods. The technique used to fire the glaze onto the brick promotes a more durable finish, that won't succumb to color fading that is common with other coloring options.

**Sizing:** Glazed Brick are available in Full Size (9 x 4 ½ x 2 ½) inch, and Split (9 x 4 ½ x 1 ¼) inch. Full size weight is 8 lbs. Split size weight is 4 lbs each.

**Technical:** Max operating temperature: 2,000° F. Modulus of Rupture: 600 psi.  
Note: Only install using ASTM C199 approved Refractory Mortars such as Heat Stop.
